

FUN Times Tables Rhymes!

Hi Educator,

Are you looking for something **research-based** to help you support children who find those **trickier times tables** hard to **recall correctly**? The book, '**FUN Times Tables Rhymes**', is just that! The times tables in it are **selected from research** of the '**Multiplication Tables Check**' questions that children typically recall incorrectly.

'**FUN Times Tables Rhymes**', is designed to help children learn the top 20 **trickiest times tables** through **fun, short story Rhymes** and **picture clues**.

Each Rhyme features: **an array, bar models, quirky picture clues** and the **reverse** matching calculation to reinforce its **commutative value**. The Rhymes can be learnt in the order they appear in the book, or specific Rhymes can be selected for the times table your children need to learn. The rhymes are ideal for learners who have **mastered the 2, 5 and 10 times tables** and learners age 7-11.

THIS BOOK ALSO INCLUDES:

- A simple **guide for grown-ups**.
- An **optional one-page week-by-week plan**.
- **Talking Points for Grown-ups** - to help children remember the Rhymes.
- A **Celebration Certificate** to celebrate learners' achievements!

EXAMPLE RHYMES:

Four pirates sailed with their dirty crew...

$$4 \times 8 = 32$$

The pirates fought over what to do...

$$8 \times 4 = 32$$
